

the top **10** reasons
to have your pet spayed or neutered
were just **KILLED** in a shelter

One un-spayed cat and her descendents can produce 420 000 kittens in just 7 years. The average female cat can produce three litters every year. The average number of kittens in each litter is between 4 and 6.

One un-spayed dog and her descendents can produce 67 000 puppies in just 6 years. The average female dog can produce two litters every year. The average number of puppies in each litter is between 8 and 10.

In Canada, approximately 220 000 cats and dogs enter shelters every year. Nearly 80 000 of those are sadly euthanized.

For the love of life, be part of the solution, not the problem.

Encourage others to do the same. There are so many ways to make a change! Use the link below or contact your local shelter if you'd like to save some lives.
